

Streamline your reinsurance administration processes with our true SaaS model.

Excel beyond the world of Excel.

Optimize your reinsurance administration work with this advanced reinsurance solution. Move beyond spreadsheets and legacy systems and upgrade to a powerful, convenient cloud-delivered SaaS model. With robust functionality right out of the box and an intuitive, accessible interface, IDP Reinsurance Services—powered by CedeRight® enables carriers of all sizes to streamline their reinsurance processes.

Supports all complex reinsurance structures including treaty and facultative, assumed and ceded, quota share/proportional, excess of loss, and more.

Key features

- **Extensive support for all forms of reinsurance**, including excess of loss (aggregate and per occurrence), quota share/proportional, treaty and facultative, and integrates deductible and inuring logic.
- **Robust reporting features and business intelligence capabilities** including on demand reports, alerts and exceptions, KPI tracking and integrations with financial accounting and reporting systems (GL and Schedule F).
- **Powerful Automation for billing production and calculations for paid, case, and incurred.** Generates complete audit trail for all calculations, statements, bordereaux reports, cover letters, footnotes, and details with option for email integration.
- **Real-time Analysis and reconciliation of data**, net exposures at any stage in the billing cycle, full policy and claim details review, historical data and alerts for sunset notices, errors, and exclusions.
- **Rich Repository of trading partner information**, contracts, financial records that can be populated via manual or automated feeds. This data is used to automate processes, calculate premium and loss cessions, and manage reinsurance treaties.
- **Recovery support processes** designed to restore workflow standards, work queues based on user-configured roles. Provides real time productivity reports.

More

Reduced Total Cost of Ownership

Built by reinsurance and technology experts, the combination of IDP and CedeRight® provides customers with a robust solution for reinsurance analytics and reporting. IDP Reinsurance Services are deployed via the cloud, resulting in rapid deployment times and a reduced total cost of ownership for carriers of all sizes. A true SaaS (software as a service) model eliminates huge licensing fees, maintenance and upgrade charges, and is based on one monthly fee.

About IDP

IDP (Insurance Data Partners, Inc.) is a leading technology services provider that has exclusively served the P&C community since 1949. We have leveraged our extensive industry knowledge and technical expertise, along with decades of rich customer insights to develop intuitive, agile, and affordable solutions. As a strategic business partner to the P&C community, IDP delivers robust SaaS solutions and comprehensive bureau reporting services for insurers, program administrators, and residual market plans. Our unparalleled technology and expertise are matched only by our unwavering commitment to each and every client's success.
